Mrs. Mac's Pies

Executive Overview

Mrs Mac's started in the 1950s under the name of "Bakewell Pies". In the late 1980s, the business had seen vast growth in distribution, new technology and products developed and the company rebranded to the Mrs Mac's name. Mrs Mac's products are now sold throughout Australia and New Zealand. The Mrs Mac's range has grown extensively in recent years with the introduction of Lite 'n Up, Microwave, Gluten Free And Special Batch.

> "With our existing DR solution, we had an RPO of about an hour. This really wasn't acceptable for us moving forward with our dependence on our IT systems. We are now replicating to SecondSite with Zerto and have an RPO of seconds."

Josh Pierre
IT Manager, Mrs. Mac's Pies

About Zerto

Zerto helps customers accelerate IT Transformation by eliminating the risk and complexity of modernization and cloud adoption with a simple, scalable IT Resilience Platform. Learn more at **www.zerto.com**

About Zettagrid

Zettagrid is an award-winning Australian cloud provider of IT Infrastructure as a Service (IaaS) for businesses. Zettagrid offers enterprise grade, on-demand data centre infrastructure with direct network connectivity. Learn more at **www.zettagrid.com**

Challenges

- No geodiversity between production and DR site – both in the same location which increased risk of the inability to recover if a disaster affected both sites.
- Previous snapshot-based back-up solution couldn't deliver the RPO/RTOs required to guarantee continuous availability
- Needed the ability to recover from ransomware as it has been become a top concern for the organisation

Solution

After new management evaluated the risk on having two datacenters on the same site, they realised they needed a new IT resilience strategy. Mrs. Mac's selected Zettagrid's SecondSite disaster recovery solution powered by Zerto's IT Resilience Platform to help reduce costs and have geodiversity with their datacenters. With Zettagrid and Zerto, Mrs. Mac's has confidence that their entire environment including their Microsoft stack and Pronto ERP system are protected. The ability to conduct a failover test at any time with no impact to production gave Mrs. Mac's the assurance that they can recover in the event of an outage or disruption.

Zerto Results

Significant RPO Reduction

RPO dramatically reduced from up to an hour to less than 30 seconds

Cost – Effective Solution

Zettagrid's SecondSite DR powered by Zerto reduced costs significantly by eliminating the second datacenter

Geodiversity of Datacenters

Greatly reduced the risk of losing data and applications by moving DR to a site managed by Zettagrid
