

Protect, Transform, and Innovate with Zerto

Zerto and HPE help businesses solve multiple use cases for continuous disaster recovery and backup, workload mobility, and multi-cloud, hybrid cloud agility

Outages & Disruptions

Protect your brand from outages and disruptions with continuous data protection

Infrastructure Modernization

Remove complexity of infrastructure refresh and modernization with support for disparate environments

Cloud Integration & Migration

Accelerate cloud integration and seamlessly move entire workloads across clouds

Ransomware Attacks

Avoid ransomware cost, downtime, and data loss with any point-in-time recovery

Consolidations & Migrations

Simplify and reduce costs of consolidations and migrations using no-impact testing

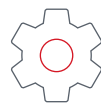

Multi-Cloud, Hybrid Cloud

Empower transformation with a unique multi-cloud, hybrid cloud strategy by leveraging the cloud that's right for you

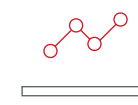

Complete Data Protection

Fulfill data retention policies and compliance requirements with converged disaster recovery and backup

Testing & DevOps

Create secure testing and DevOps environment via offsite clones

Analytics Across Sites & Clouds

Full visibility to manage & optimize multi-site, multi-cloud environments with intelligent dashboards

IT Resilience Platform™

Converges disaster recovery, backup, and workload mobility solutions into a single, simple, scalable platform

Pillars	Problem Solved	Customer Value
Continuous DR & Backup	Protect against any disruption planned or unplanned	Providing an always-on customer experience for applications on-premises or in the cloud
Workload Mobility	Migrate and consolidate workloads with ease	Simplify disaster recovery and workload mobility to protect critical applications against all disruptions including viruses and ransomware
Multi-Cloud, Hybrid Cloud Agility	Move to, from or between clouds to accelerate your business	Easily migrate workloads across heterogenous storage and private and public clouds without data loss in minutes

HPE Validated Technologies

Zerto and HPE validated technologies for hybrid and multi-cloud environments
