Hewlett Packard Enterprise (HPE) and Zerto have collaborated to deliver workload protection by converging disaster recovery (DR), backup, and data mobility to eliminate the risks and complexity of modernization and cloud adoption. Powered by the HPE Complete Program and the Zerto platform, this solution is designed to accelerate IT transformation through a single, scalable platform for cloud data management and protection.

**The Zerto Platform**

The Zerto platform delivers workload protection and mobility for HPE users, delivering a simple software experience for DR, backup, and data mobility.

**Unlock the Value of the HPE Complete Zerto Solution**

**Converged DR, Backup, and Cloud Mobility.** Zerto’s continuous data protection (CDP) technology continuously captures and tracks data modifications so you can easily restore back to any point in time with granularity. Zerto uses near-synchronous replication at the hypervisor level, creating data checkpoints seconds apart. You can easily recover from each checkpoint using Zerto’s intuitive journal recovery with RPOs of seconds. Additionally, you can unlock industry-leading RTOs with Zerto’s application-consistent approach. Easily recover an entire multi-VM application via the journal without manual VM recovery, with minimal downtime and data loss.

**Orchestration and Automation.** Zerto’s automated workflows allow failovers, migrations, and application recovery in just a few clicks without any disruption to your production environment. Built-in orchestration and automation enable faster management of workloads at scale with minimal touch, allowing IT resources to shift their focus toward innovation and services that help your business run more efficiently. You can easily protect and migrate workloads to, from, and between clouds without production impact for your data on premises or in Azure, AWS, IBM Cloud, and more. You can perform testing without any production impact or protection gap and fully automate deployment and VM protection.

**KEY CAPABILITIES**

<table>
<thead>
<tr>
<th>One Platform</th>
<th>Replace multiple complex tools with a single, simple, scalable platform</th>
</tr>
</thead>
<tbody>
<tr>
<td>Always-On Replication</td>
<td>Say goodbye to periodic backups and snapshots: Zerto uses near-synchronous replication at the hypervisor level</td>
</tr>
<tr>
<td>Hybrid and Multi-Cloud</td>
<td>Protect and migrate workloads to, from, and between clouds without production impact</td>
</tr>
<tr>
<td>Workload Mobility</td>
<td>Create seamless recovery, consolidation, and migration experiences in just a few clicks</td>
</tr>
<tr>
<td>Unrivaled Visibility</td>
<td>Maintain visibility across your multi-site, multi-cloud environment from anywhere</td>
</tr>
<tr>
<td>Lowest RTOs/RPOs</td>
<td>Achieve the lowest RTOs and RPOs in the industry without the need for snapshots</td>
</tr>
</tbody>
</table>
About Zerto

Zerto helps customers accelerate IT transformation through a single, scalable platform for cloud data management and protection. Built for enterprise scale, Zerto’s simple, software-only platform uses continuous data protection to converge disaster recovery, backup, and data mobility and eliminate the risks and complexity of modernization and cloud adoption. Zerto enables an always-on customer experience by simplifying the protection, recovery, and mobility of applications and data across private, public, and hybrid clouds. Zerto is trusted by over 9,500 customers globally. www.zerto.com

Savings in More Ways Than One. Zerto helps you save both time and money. By using Zerto for workload protection and replacing backup with CDP, customers can unlock TCO savings of 50 percent over traditional, noncontinuous backup and DR solutions. You can be up and replicating within two hours of the installation with an intuitive, simple configuration process, and this speed and simplicity apply to the upgrade process as well.

Protect, Transform, and Innovate with Zerto and HPE

Zerto is part of the HPE Complete Program, a one-stop shop for leading products coupled with HPE technologies. Customers can purchase Zerto from HPE and HPE resellers, enabling IT resilience for HPE-validated solutions. It allows customers using Zerto to tap into the HPE ecosystem to increase IT agility while reducing the risk, complexity, and cost that often come with multi-vendor deployments.

WHAT’S NEW

Zerto 9.0 introduces new public cloud backup platforms and capabilities for complete data protection flexibility. With the launch of Zerto for Kubernetes, Zerto now provides the same protection for containers that they do for VMs. The Zerto 9.0 release supports even more cloud platforms; managing and protecting all your cloud data and applications—wherever they reside—just got simpler.

HPE Primera
Unlock the value of Zerto and HPE Primera tier 0 storage to protect your virtualized workloads. Combining Primera’s 100% uptime guarantee with Zerto’s leading RPO/RTO delivers industry-leading uptime.

HPE Nimble
Protect your workloads in your datacenter or cloud using Zerto and HPE Nimble’s intelligent, self-managing flash storage.

MSA Storage
Zerto, powered by HPE servers, switches, and HPE MSA storage brings enterprise-class resilience to a budget-friendly solution.

HPE SimpliVity
Zerto combines with the simplicity of HPE SimpliVity for DR, backup, and data mobility for an intelligent, cloud mobile, and disaster-proof hyperconverged solution.

HPE StoreOnce Catalyst
With Catalyst API integration, Zerto benefits from source-side dedupe using HPE StoreOnce as a backup target.

HPE Cloud Volumes
Secure cloud storage for Zerto’s LTR backups utilizing the Catalyst API for source-side dedupe with ZERO egress charges for recovering your data.

StorMagic SvSAN
HPE Complete, StorMagic, and Zerto provide a unique solution where edge workloads can be protected while still maintaining the performance, processing, and minimal footprint.
