

Zerto + HPE: Better Together

Converging DR, backup, and cloud mobility into a single, simple, scalable platform

HPE and Zerto have collaborated to deliver the HPE Complete Zerto Solution. Powered by HPE Technology and the Zerto IT Resilience Platform, this solution is designed to change the way disaster recovery, backup and cloud is managed for organizations. Focused on delivering an uninterrupted customer experience while reducing the tools and complexity of your datacenter.

Zerto IT Resilience Platform™

Zerto's IT Resilience Platform converges disaster recovery, backup, and workload mobility whether on-premises or to, from and between hybrid and multi-cloud environments.

Unlocking the value of the HPE Complete Zerto Solution

Converged DR, Backup and Cloud Mobility: Zerto's Continuous Data Protection (CDP) technology continuously captures and tracks data modifications so you can easily restore back to any point in time with granularity. With the ability to replicate your data between your HPE hardware and different cloud platforms, Zerto's hypervisor-based replication and journal-based recovery technology powers the recovery and mobility of entire sites, VMs, applications and files from any point in time with seconds of granularity. Now you can recover entire virtualized data centers or a single file, from seconds or years ago all using the HPE technology of your choice.

Orchestration and Automation. Built in orchestration and automation enables faster management of workloads at scale with minimal touch, allowing IT resources to shift their focus toward innovation and services that help your business run more efficiently. Protect and migrate workloads to, from and between clouds without production impact for your on-premises, Azure, AWS, IBM Cloud, and more. Perform testing without any production impact or protection gap and fully automate the deployment and VM protection. You can even create seamless recovery, consolidation, and migration experiences in four easy clicks!

KEY CAPABILITIES

One Platform

A single, simple, scalable platform replacing multiple complex tools

Always-On Replication

Say goodbye to periodic backups and snapshots. Deliver the tightest RTOs and RPOs

Hybrid and Multi-Cloud

Protect and migrate workloads to, from and between clouds without production impact

Workload Mobility

Create seamless recovery, consolidation, and migration experiences in four easy clicks

Unrivaled Visibility

Maintain visibility across your multi-site, multi-cloud environment from anywhere

Lowest RTOs/RPOs

Zerto delivers the lowest RTOs and RPOs in the industry without the need for snapshot

Analytics and Control. Zerto Analytics, included in the IT Resilience Platform, provides one single, comprehensive view of your entire multi-site, multi-cloud environment. Built-in intelligent dashboards provide real-time and historical analysis of the health and protection status of your applications and data. Including resource planning needs to scope your infrastructure needs of the present and future.

Protect, Transform, and Innovate with Zerto and HPE

Zerto is part of the Hewlett Packard Enterprise (HPE) Complete Program, a one-stop shop for leading products coupled with HPE technologies delivering interoperability, reliability, and validation for the end-to-end solutions.

Customers can purchase Zerto from HPE and HPE resellers, enabling IT resilience for HPE validated solutions. It allows customers using Zerto to tap into the HPE ecosystem to increase IT agility while reducing risk, complexity and cost that can be associated with multi-vendor deployments.

WHAT'S NEW

Zerto 7.5 brings a deeper integration with HPE StoreOnce Catalyst as an available secondary storage repository for long-term retention. Solve your historical retention needs such as Compliance, or mandatory retention and enable the complete protection of your VMs from a few seconds to decades ago.

[LEARN MORE](#)

HPE 3PAR StoreServ

Unlock the value of Zerto and HPE 3PAR's primary storage architecture to protect your VMs to protect your workloads and maintain a hybrid or private cloud.

HPE Nimble

Protect your workloads in your data center or cloud using Zerto and HPE Nimble's intelligent, self-managing flash storage.

MSA Storage

Zerto powered by HPE servers, switches, and HPE MSA storage creates an IT Resilience solution that is unmatched.

HPE SimpliVity

Zerto works seamlessly with HPE SimpliVity to replicate VMs to local or remote sites with industry leading RTOs & RPOs while delivering hyperconvergence at scale.

NEW HPE StoreOnce Catalyst

This deeper integration with Zerto allows users to use HPE StoreOnce Catalyst as a target site for long-term retention.

About Zerto

Zerto helps customers accelerate IT transformation by eliminating the risk and complexity of modernization and cloud adoption. By replacing multiple legacy solutions with a single IT Resilience Platform, Zerto is changing the way disaster recovery, data protection and cloud are managed. With enterprise scale, Zerto's software platform delivers continuous availability for an always-on customer experience while simplifying workload mobility to protect, recover and move applications freely across hybrid and multi-clouds. www.zerto.com
