Multi-Cloud Automation Meets Continuous Data Protection

Morpheus provides unified orchestration for multi-cloud automation and application lifecycle management. This includes integration with Zerto for always-on replication of entire multi-VM enterprise applications.

About Zerto

Zerto converges disaster recovery, ransomware recovery, and multi-cloud mobility into one simple, scalable solution. Purpose-built for the virtualized datacenter, Zerto's software-only solution offers continuous data protection across hybrid and multi-cloud environments. Zerto provides always-on replication of even the most demanding enterprise applications to ensure 24x7 availability and complete workload mobility.

About Morpheus

Morpheus is a 100% agnostic cloud management platform (CMP) that ships out-of-the-box with 80+ integrations for rapid value and zero lock-in. Excelling in complicated heterogeneous environments, it's the CMP of choice for eliminating silos, standardizing multi-cloud management, and enabling DevOps self-service. Morpheus provides unified orchestration for multi-cloud automation and application lifecycle management. This includes integration with Zerto for always-on replication of entire multi-VM enterprise applications.

Morpheus + Zerto

With Zerto and Morpheus, IT teams can easily deploy and protect their hybrid infrastructure across on-premises and cloud platforms. As business requirements expand and IT adopts new technologies, the solutions from Zerto and Morpheus allow for rapid application deployment and infrastructure resilience while minimizing the tools IT teams need to leverage.

With Morpheus users will be able to deploy VMs faster across multiple platforms, then leverage Zerto to protect and mobilize an application's VMs to, from, or between clouds of all types.

From deployment to management to protection, Morpheus and Zerto ensure a seamless, enterprise-class experience built for today's multi-cloud world.

Gartner on Zerto & Morpheus

"Zerto is a leading provider of enterprise disaster recovery and IT resilience management software."

"Morpheus Data has one of the most fully featured cloud management solutions, with strong offerings in all the key functional areas."

Use Cases

Automate provisioning and protection of virtual infrastructure

Simplify management of hybrid and multi-cloud environments

Accelerate public cloud adoption while providing governance and control

Improve self-service in modern DevOps cultures

Monitor and forecast hybrid infrastructure

Getting Started with Zerto and Morpheus

After deploying the Zerto Virtual Manager (ZVM) using an installer from myZerto (www.myZerto.com), log in to Morpheus to begin integration setup:

1. Navigate to Backups → Integrations

2. Select + ADD

3. Select Zerto

4. Fill in the following:

   Name

   Name of the integration in Morpheus, e.g. "Zerto"

   Enabled

   Enable the integration

   API URL

   API URL for Zerto Virtual Manager

   Example API URL: https://zvm_IP:9669

   Username

   Admin username for Zerto

   Password

   Password for username provided (encrypted in Morpheus).

   **Visibility**

   Sets Multi-Tenant Visibility

   Private

   Only Available to the Tenant the Integration is added by

   Public

   Available to Sub-Tenants (master tenant option only)

5. Click **SAVE**

6. During the provisioning process select Zerto for replication
