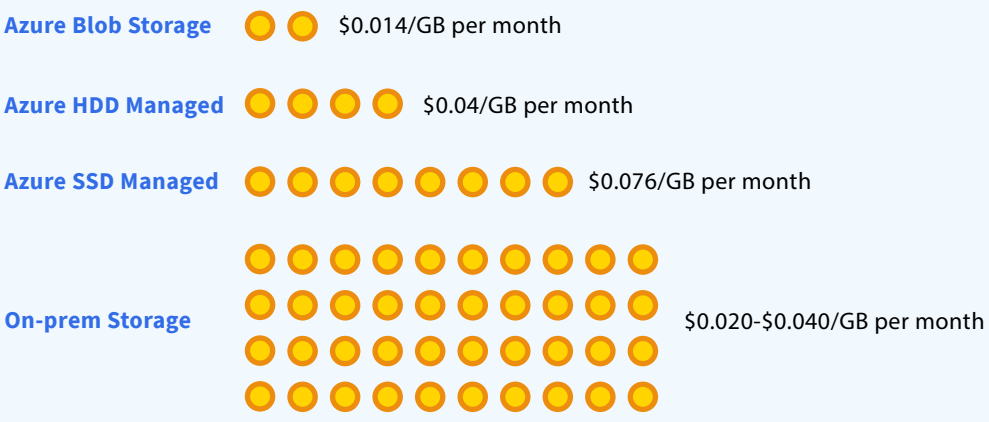
TOP 5

Top 5 Reasons to use Azure for Disaster Recovery with Zerto

Zerto | Microsoft Azure

Cost Savings

With Zerto's Disaster Recovery to Azure, avoid the costly capital expenditures of maintaining a physical location and unlock a pay as you go approach, only paying for the IT resources that you need.



INCREASED EFFICIENCY

Using Zerto for disaster recovery to Azure avoids having to maintain servers, hardware, networking and maintenance of a secondary site, and only pay for premium and compute storage when you test, recover, or migrate.

POWER
consumed by servers and their cooling systems
17¢/ kWH

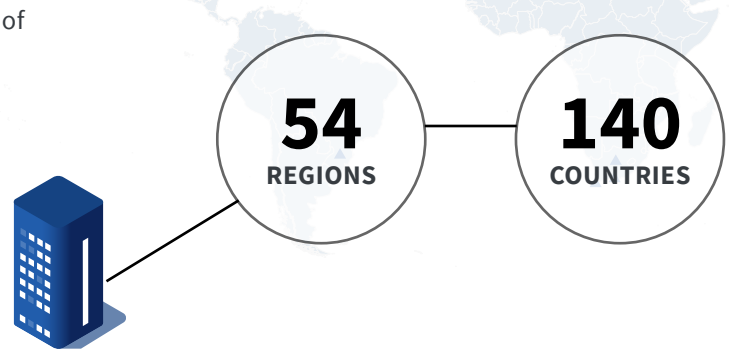
HARDWARE
costs to operate a rack of servers
$1500–2000 /month

LABOR
to maintain the environment
$135K/ yr
server admin managing 80 servers

RELIABLE INFRASTRUCTURE

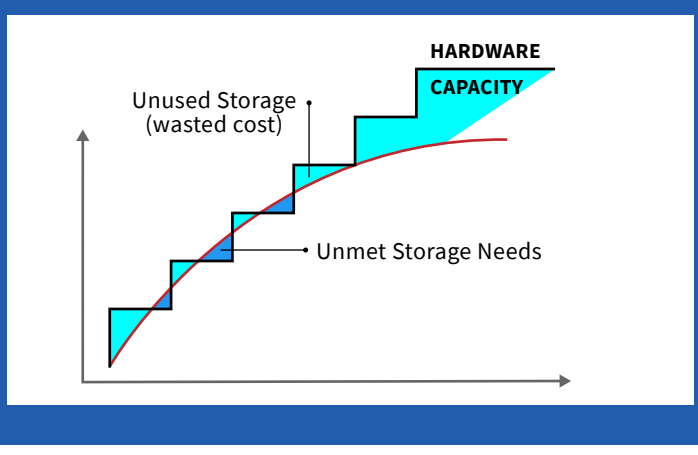
Transition from a single recovery site to the global reach and reliability of Azure, with 54 regions available in 140 countries, plus the added security of redundancies in the public cloud.

Microsoft Azure



FLEXIBILITY AT SCALE

Zerto's scale out architecture built for the enterprise allows you to easily expand how many critical workloads you are protecting, along with adding Zerto Continuous Backup to cost-effective Azure blob storage.



With Azure Blob Storage, pay only for what you need, while gaining the flexibility to expand to growing needs.

ZERTO AND AZURE - YOUR TRUSTED CLOUD SOLUTION

Supporting your cloud journey to protect, move and recover applications and data anywhere

GLOBAL
The largest compliance portfolio of any cloud provider

TRUSTED
Over 3,500 cybersecurity experts that help safeguard your business assets and data

HYBRID CLOUD
Disaster recovery, backup and mobility, on-premises, across multiple clouds and at the edge

WORKLOAD MOBILITY
Move application and data workloads to Azure with ease, without risk and be 100% protected

FUTURE READY
Cloud data management and protection for public cloud, SaaS, and Kubernetes workloads
