Zerto Overview

Modern organizations, across the globe and regardless of industry, all have at least one commonality: they’re reliant on data and critical applications to drive growth and innovation in today’s 24x7, always-on world. The growth rate of data, distributed across disparate platforms, is creating new demand for continuous protection of those digital assets—yet data protection solutions have not kept up with the pace of change and the realities of enterprise businesses.

Zerto, a Hewlett Packard Enterprise company, helps customers protect, recover, and move their data and applications for continuous availability across on-premises, hybrid, and multi-cloud environments.

**Zerto’s highly scalable, software-only solution is ideal for these primary use cases:**

- **Ransomware Resilience**
  Allows you to detect malicious encryption events then quickly recover in minutes by rolling back to a granular point-in-time just seconds before an attack

- **Disaster Recovery**
  Offers fool-proof recovery with industry-leading RPOs of seconds and RTOs of minutes to dramatically limit data loss and downtime

- **Multi-Cloud Mobility**
  Unlocks the freedom to innovate across clouds and the agility to migrate to, from, and between heterogeneous platforms

---

**KEY HIGHLIGHTS**

Zerto is used by over 9,500 customers across 100 countries and is powering offerings from 1,500 channel partners and 350 managed service providers who offer Zerto as a service. Zerto supports the following platforms:

- VMware vSphere
- VMware Cloud Director
- Google Cloud VMware Engine
- IBM Cloud for VMware Solutions
- Microsoft Azure VMware Solution
- Oracle Cloud VMware Solution
- Amazon Web Services
- Microsoft Azure
- Amazon Elastic Kubernetes Service
- Google Kubernetes Engine
- IBM Cloud Kubernetes Service
- Red Hat OpenShift
- VMware Tanzu

Zerto is also available on the HPE GreenLake edge-to-cloud platform as the service named HPE GreenLake for Disaster Recovery.

For protecting SaaS data, Zerto Backup for SaaS, powered by Keepit, supports:

- Azure Active Directory
- Microsoft 365
- Microsoft Dynamics 365
- Microsoft Power BI
- Google Workspace
- Salesforce
- Zendesk
Key Advantages

Continuous Data Protection (CDP): always-on, near-synchronous replication with no production impact, no scheduling, no snapshots, and no agents. Simple, software-only deployment with small footprint/low overhead components using your hardware and storage of choice.

Journal-Based Recovery: Zerto’s RPOs of seconds and RTOs of minutes—with tens of thousands of checkpoints in a granular journal—ensure you can recover quickly to an exact state immediately before an attack or disruption. Offline copies from the journal can be made immutable for additional resilience.

Application-Centric Protection: Zerto maintains write-order fidelity across an entire multi-VM or Kubernetes app stack, even if workloads are on different hosts/nodes or storage. No staggered backup windows means radically simple recovery.

Hybrid and Multi-Cloud Agility: Scale-out architecture purpose-built for the cloud, using native services and storage to enable seamless mobility and workload conversion from on-premises to cloud and back. Easily leverage multiple clouds with Zerto’s simultaneous one-to-many replication or natively protect within the public cloud with scalable DR across regions within Azure or AWS.

Orchestration, Automation, and Analytics: Orchestration and automation are built-in, with easy interoperability with a customer’s existing tech stack and unlimited extensibility using robust, Swagger-based REST APIs.

Simplicity at Scale: Save time and administrative resources with consumer-level simplicity brought to the enterprise, even when protecting thousands of VMs with single-digit RPOs across multiple clouds.

Key Benefits

<table>
<thead>
<tr>
<th>Zerto feature</th>
<th>Mitigate disruptions</th>
<th>Neutralize ransomware threats</th>
<th>Modernize infrastructure</th>
<th>Unlock hybrid and multi-cloud</th>
<th>Simplify migrations</th>
<th>Improve operational efficiency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Protect your brand from outages and disruptions by dramatically limiting data loss and downtime.</td>
<td>Detect and recover in minutes to a state seconds before an attack</td>
<td>Remove complexity to support disparate infrastructures and capitalize on new tech.</td>
<td>Drive digital transformation with cross-platform protection for IaaS, PaaS, and SaaS.</td>
<td>Reduce resources and speed up data center consolidations with hassle-free, cross-cloud migrations.</td>
<td>Automation, orchestration, and consumer-level simplicity streamline IT operations.</td>
<td></td>
