

Ajover S.A.S

ZERTO CASE STUDY

WHO ARE THEY?

Ajover S.A.S is a worldwide group of leading manufacturing companies specializing in petrochemical, construction, and packaging products. Their construction division has been offering quality products to the Colombian market for over 30 years.

PROBLEM

- Needed to obtain replication and DR capabilities in order to simplify future growth processes
- Required continued flexibility for future business growth
- Lacked replication that was agnostic to underlying hardware

SOLUTION

- With the help of AGILITIX and Zerto, Ajover S.A.S was able to replicate 15 virtual machines with a significantly reduced RPO and RTO
- Easily protecting 5.5 TB of SQL data
- Utilizing the integration of Zerto Virtual Replication with Nutanix machines and a VMWare hypervisor, they achieved a complete hyper-converged architecture

RESULTS

RPO REDUCTION

RPO reduced from
15 minutes
to 1 minute

RTO REDUCTION

RTO reduced from
45 minutes to
15 minutes

STORAGE SAVINGS

They have granular
point-in-time
recovery for highly
transactional
SQL databases

"The flexibility of Zerto made it possible to keep our current infrastructure in place which allowed us to significantly save on costs."
