Zerto Powers Domino UK's Secure SaaS Growth—in the Cloud and into the Future

About Domino

Domino provides comprehensive printing and labeling services to help manufacturers ensure that their products are correctly coded for compliance, batch monitoring and traceability, and direct-for-consumer promotion and engagement. With more than 40 years' experience working at the heart of industrial and commercial printing markets, Domino is trusted by manufacturers around the world to maximize production, reduce waste, and add value.

Challenges

- Improve the ransomware security and recovery protection of its SaaS applications

- Adopt a disaster recovery (DR) solution that could effectively protect against ransomware encryption and speed recovery efforts

- Migrate from SMB file servers to Teams, completely moving operations to the cloud

- Eliminate the need for on-premises IT infrastructure and reduce operating workload with a SaaS solution

- Scale up without increasing operating costs and burden

Solution

- Defend against data loss and the threat of ransomware for Microsoft 365 with Zerto Backup for SaaS powered by Keepit

- Support a complete migration to the cloud with Zerto's cloud-agile solution

- Enable continued growth and reduce overhead with Zerto Backup for SaaS unlimited data licensing model

- Streamline operations with an easily installed, user-friendly solution

Zerto Results

- Eliminated Domino's capital expenditures with a hosted service that provides everything needed to protect Domino's data with no extra hardware, maintenance, administration, or cooling required

- Recovery times are significantly reduced, resulting in greater value delivered to customers

- Protection of Domino's business-critical data in seconds with Zerto's fully automated backup and recovery solution for Microsoft 365

- Zerto is self-monitoring and automatically notifies the team of any items requiring attention, freeing up resources that would be otherwise used for constant supervision

- Zerto's licensing model and scalability supports Domino's growing business, employee numbers, and user base

Protecting against Ransomware and Supporting Cloud Mobility with Zerto

With over 120 countries supported by its offices and distributor network, Domino knew it couldn't afford to take the risk on ransomware. As a trusted name in commercial and industrial printing, Domino needed to confidently maintain that reputation while they migrated to the cloud amid the evolving threats of today's digital landscape.

Their ideal disaster recovery solution needed to recover quickly to just minutes before disruption occurred. The solution also had to scale easily to meet their business goals for continued growth. And because they were migrating all their data from SMB servers to the cloud, they needed a ransomware protection solution that was truly cloud mobile and VM-free.

Domino chose Zerto, a Hewlett Packard Enterprise company, because of its simplicity, ease of installation and use, and licensing model for unlimited data. "We didn't have to worry about growth or retention limits with Zerto," says Craig Morey. Zerto's scalability enables Domino to plan for future growth without worrying about the additional operating costs and resources required to expand and maintain their SaaS protection. With licenses currently in place protecting each of its employees, Domino UK uses Zerto Backup for SaaS as its data protection solution to meet the needs of its growing user base.

Beyond scalability and user-friendly design, Zerto provides Domino with drastically reduced recovery times. "It's not like the old tape drive systems that would fail and give errors every day," Morey says. "We're able to restore data for our customers very quickly, which is something that used to take a lot longer. It's just solid on restores." Zerto brings Domino the same industry leading RPOs and RTOs that put it ahead of traditional backup and other DR solutions.

If there is an issue requiring attention, Zerto automatically notifies the Domino team, providing them with data protection that streamlines their operations rather than increasing their maintenance burden. "It's not labor-intensive," Morey says. "We don't have to check it every day."

With industry-leading continuous data protection and cloud mobility, Zerto gives Domino assurance and confidence to grow and move to the cloud while providing reliable service to its global customer base.

About Zerto

Zerto, a Hewlett Packard Enterprise company, empowers customers to run an always-on business by simplifying the protection, recovery, and mobility of on-premises and cloud applications. Zerto's cloud data management and protection solution eliminates the risks and complexity of modernization and cloud adoption across private, public, and hybrid deployments. The simple, software-only solution uses continuous data protection at scale to converge disaster recovery, backup, and data mobility. Zerto is trusted by over 9,500 customers globally and is powering offerings for Microsoft Azure, IBM Cloud, AWS, Google Cloud, Oracle Cloud, and more than 350 managed service providers. **www.zerto.com**
