

This PeerStory is a collection of quotes from a real user sharing their experience using Zerto on PeerSpot.

Nathaniel M.
System Engineer at Total
Quality Logistics

Use Case

In the past, we were predominantly using Citrix Hypervisor in the Hyper-V shop. Now that we've moved to VMware, we utilize Zerto to move those VMs from Hyper-V and Citrix Hypervisor over to VMware.

Valuable Features

The feature I've found most valuable so far has been the ability to migrate the VMs from Hyper-V and Citrix Hypervisor. It's **made our migration seamless**. In the beginning, we were looking at freeware tools, and it was just a massive headache. Zerto solved a lot of the roadblocks that we'd run into in the past.

Results

Zerto improved our organization by **giving us flexibility back with migrating VMs**,

"When you compare the ease of use of Zerto with those of other solutions, Zerto is much easier to use. It's idiot-proof."

"We've been able to set up a set schedule of moving certain VMs on certain dates, and we've been pretty confident that it's going to go smoothly without interruptions."

and I look forward to the future when we utilize it more for DR situations.

ROI

Zerto **helped reduce downtime every week**. I believe 15 minutes of downtime is equivalent to a million in cost. So, it would probably cost our organization four to five million per hour of downtime.
