# Zerto In-Cloud is on the AWS Marketplace!

## Deliver Disaster Recovery Globally in AWS

Zerto In-Cloud for AWS delivers disaster recovery (DR), scaling to protect 1,000+ Amazon Elastic Compute Cloud (EC2) instances across AWS Regions and Availability Zones. Zerto In-Cloud brings reliability and speed to the protection of enterprise applications on AWS with simple automated workflows for failover, recovery, and testing.

Zerto empowers customers to run an always-on business by simplifying the protection, recovery, and mobility of on-premises and cloud applications eliminating the risk and complexity of modernization and cloud adoption across private, public, and hybrid deployments. To mitigate cyber threats, Zerto detects, protects, and recovers from ransomware. The simple, software-only solution uses continuous data protection at scale to solve for ransomware resilience, disaster recovery, cloud mobility.

## Why Go Through the AWS Marketplace?

Zerto In-Cloud in AWS Marketplace simplifies procurement, increases your ability to govern and guide your organization, and gives you the ability to start and scale your disaster recovery strategy at your own pace.

AWS Marketplace streamlines the installation process. Zerto In-Cloud licensing is supported through AWS, meaning you can start small and scale up when you're ready. Because Zerto supports enterprise-level scalability, it can protect your IT environment whether it has tens or thousands of Amazon EC2 instances across AWS Regions and Availability Zones.

Subscribing to Zerto In-Cloud through AWS Marketplace also simplifies procurement, reducing the number of interfaces and documents to manage. AWS Marketplace enables you to add Zerto In-Cloud for AWS to existing AWS Accounts and streamline legal procurement with standard contracts and contract amendments.

# How It Works

Zerto In-Cloud is now available through AWS Marketplace with just a few simple clicks!  New benefits:

- Effortless scale to protect thousands of Amazon EC2 instances and petabytes of data without agents or additional replication appliances

- Consistently achieve the lowest RTOs and RPOs in the industry

- Flexible management of your disaster recovery, aligning with existing solutions and automation workflows

- Simple solution implementation, configuration, and management Global coverage enables protection to, from, and between 17 AWS Regions and all associated Availability Zones...supporting up to 3 AWS Regions simultaneously

- Integrates with CloudWatch enabling DR operations & resources to be monitored alongside all other AWS resources

| Zerto Feature | Benefit |
|---|---|
| Effortless Scalability | Through an agentless, native integration approach, Zerto In-Cloud enables easy scaling to protect 1000+ workloads, providing resilience for enterprises of all sizes in Amazon EC2. |
| Orchestration | Zerto In-Cloud automates the protection of Amazon EC2 instances, simplifying the steps to implement and execute protection and recovery plans. Failover and failover test features are then automated for scalability and simplicity. |
| Management Flexibility | A complete REST API is at the forefront of Zerto In-Cloud management so that the solution can be easily integrated with other management systems and combined with other automation and integration solutions, such as Ansible, Jenkins, and Terraform. |
| Automated Failover Testing | Zerto In-Cloud automation and orchestration allows for non-disruptive failover testing of all instances in an AWS Region or Availability Zone to validate recovery plans and ensure you are ready when an outage strikes. |

Zerto In-Cloud for AWS is ready to support your DR strategy. Subscribe today in AWS Marketplace:
