

ZERTO CUSTOMER CORNER | Q2 2023

Welcome! Check out the highlights in this quarter's edition of the Zerto Customer Corner:

- Join us on April 4th at 12 pm CT for HPE Storage Day. Hear the latest updates on HPE GreenLake for Disaster Recovery and how to join the preview program.
- Don't miss our live-streamed Zerto 10 launch event on May 18th at 11:00 am ET with guest speaker, Kevin Mitnick.
- Listen in on upcoming webinars that can help you battle ransomware and protect your Kubernetes environment. Plus, join the Guardians of the Galaxy premiere event!
- Take a look at three of our new customer reviews where they share their Zerto experience.

If you have suggestions on how we can improve future editions, please send us an [email here](#).

HPE Storage Moment/GreenLake for DR Preview

HPE GreenLake Day for storage

Store, manage, and protect your data across hybrid cloud

Broadcasting live from Houston, TX
Tuesday, April 4, 2023 from 12 to 12:30pm CT

[Save the date →](#)

Join us on Tuesday, April 4, 2023, from 12-12:30 pm CT to see the latest HPE GreenLake cloud services for storage that help you solve your data lifecycle. On HPE GreenLake Day for storage, partners and analysts will discuss and demo four solutions, including HPE GreenLake for Disaster Recovery. This DR solution is built with Zerto technology using our continuous data protection (CDP), now available on a global, scalable SaaS platform – HPE GreenLake. You will learn how you can seamlessly store, manage, and protect all your data from a single, unified platform.

On April 4th, see how HPE GreenLake for data protection can help you simplify data management, accelerate your performance, and how you can seamlessly integrate across your hybrid cloud.

Interested in Previewing HPE GreenLake for Disaster Recovery?

Join the preview program to see how you can deploy, manage, and protect your most mission-critical assets on the HPE GreenLake hybrid-cloud platform.

After the storage day event, you can join Zerto on **April 13, 2023**, at 11 am ET to learn how we are bringing Zerto to HPE GreenLake by offering a SaaS-based DR solution. Navigate the other service offerings inside the HPE cloud console with us and discover how you can achieve full data protection pairing HPE GreenLake for Disaster Recovery with HPE GreenLake for Backup and Recovery.

Zerto 10 Launch

Zerto 10 Launch with Guest Speaker, Kevin Mitnick

Join the live-streamed Zerto 10 launch event on **May 18 at 11:00 am ET at HPE's Houston headquarters**. Hosted by Caroline Seymour, VP of Product Marketing, you'll hear from guest speaker, Kevin Mitnick, IT security consultant, author, and one of the world's most famous hackers, discussing the current state of cybersecurity and how we're transforming continuous data protection to combat cyber threats.

See the new Zerto 10 feature highlights below and register now to join the launch event virtually.

In the Houston area? You're invited to join us in person at the HPE Houston headquarters. If you'd like to attend in person, please [email us](#) and we'll reserve your seat.

Real-Time Ransomware Detection

With real-time encryption anomaly detection, you'll get an early warning of a ransomware attack and help to zero in on when it began so that you can recover data can to a point just seconds prior to it.

Zerto for Azure

Enhance in-cloud data protection for Microsoft Azure with new replication architecture for more efficient scale out protection of 5000 VMs to, from, and within Azure.

Turnkey, Hardened Zerto Virtual Manager Appliance

The Zerto Virtual Manager (ZVM) deploys quickly and securely as a new, pre-hardened virtual appliance. Replacing the legacy Windows-based Zerto Virtual Manager, this Linux-based appliance is easier to deploy, more secure, and is maintained automatically during product updates.

Zerto 10 Launch Event with Kevin Mitnick

Real-time Detection for Real-Time Protection

Don't forget to register to join us for the launch event on May 18 at 11:00 am ET.

Watch On Demand

Hitchhiker's Guide to Kubernetes DR

Aired on Wednesday, March 29

@ 2:00 pm ET | 11:00 am PT | 7:00 pm BST

Hosted by: Anthony Dutra, Technical Marketing Manager

Just as space travel transforms the way we understand our universe, Kubernetes is revolutionizing the way we manage and deploy containerized applications. However, it's not totally safe exploring the unknown! Many organizations are finding this new frontier comes with data protection challenges.

Join Anthony Dutra, Zerto Technical Marketing Engineer, as he explores the dark depths of disaster recovery for Kubernetes. Learn how Zerto's cloud-native solution enables disaster recovery of K8s applications that is storage-agnostic, API-first, doesn't rely on legacy technologies, and protects all resources that comprise an application.

CONVERGE
TECHNOLOGY SOLUTIONS

Zerto
a Hewlett Packard
Enterprise company

Thursday, May 4

@ 6:00 pm Local Time

Join Zerto, a Hewlett Packard Enterprise company and Converge Technology Solutions at a private event featuring the premiere of Guardians of the Galaxy Vol 3.

With data now in disparate locations and workloads — and in the hands of more users than ever — rapid recovery is key when an attack gets through. Preventing ransomware is no longer enough. Increasingly sophisticated malware can slip through your defenses, encrypt your critical data, and cripple your business. With Converge and Zerto, guard your organization to ensure your infrastructure, data and people are protected as cybersecurity threats and the regulatory landscape changes.

Customer Spotlight

CUSTOMER REVIEWS:

Read unbiased peer reviews on how companies are seeing real results in improving data protection, ROI and efficiency with Zerto.

A senior network administrator at a financial services firm highlights how they have lowered RPOs because of Zerto's efficient, near-synchronous replication:

"The near-synchronous replication is key. That has allowed us to provide the low RPOs that we promise. For key systems, that has been the deciding factor." Read the [full review here](#).

An IT analyst at a wholesale/distributor company gives Zerto's near-synchronous replication a 10 out of 10:

"The near-synchronous replication is one of the primary reasons we're using Zerto because we have recovery intervals of sub-five seconds. On a scale of 10, where 10 is "very important", this feature is a 10." [Read the full review here](#).

In this G2 review, Rohit highlights Zerto's ease of use:

"This tool has changed the way of DR or DR tests. Very simple and easy to manage, and the best part of we can make a point of recovery of protected VMs, and the DR is possible for VMs running with RDMs." [Read the full review here](#).
